INTRODUCTION TO THE COURSE

The course surveys election rules and their effects in theory and practice, addressing questions such as:

- What are the advantages/disadvantages of different rules?
- Can election rules balance the demands of effective governance and fair representation?
- How does election administration affect the integrity of voting?
- How do election rules affect the behavior of voters and political parties?
- What are the origins and functions of political parties?

I present course material in lectures, discussions, and classroom activities, using examples from all regions of the world. I base student evaluations on exams, a research paper, a group project, online quizzes, and class participation.

GENERAL EXPECTATIONS

I expect all students to behave professionally in this class. You will be held responsible for all reading and classroom material. If you miss a class, you are still responsible for the content of that day's class (you must obtain notes from another student; my notes will not be made available for student use). I will not tolerate disruptive behavior, including reading newspapers, text messaging, talking during lectures, and insulting classmates or the instructor. **You must turn off all cell phones during class.**

The research paper must be submitted in hard copy and electronically. I will check the electronic version with a plagiarism detection tool. Please send a copy of the paper via e-mail in txt, rtf, or doc format. Failure to submit an electronic copy will result in a grade of "incomplete" for the course. If you would like to challenge any grade that you have received, you must submit a typed explanation of why the grade should be reconsidered before we meet to discuss a grade change.

Any student in this course who has a disability that may preclude demonstrating fully his or her abilities should contact me as soon as possible. We will discuss accommodations necessary to ensure full participation in the course.

COURSE REQUIREMENTS AND GRADING

Your grade will be based on the following components:

- 1) Exams (40%)
- 2) Research Paper, Proposal, and Presentation (20%)
- 3) Group Election Blog (20%)
- 4) Quizzes (10%)
- 5) Attendance and Participation (10%)

Exam: You will take two exams during the term. Each exam constitutes 20% of your grade.

Research Paper, Proposal, and Presentation: A 12-15 page research paper, written proposal, and oral presentation account for 20% of your grade. A two-page written proposal is due on October 28, 2008. The final paper is due at the beginning of class on December 11, 2008. Late papers will be penalized 10% for every day they are late. No work will be accepted after the end of the final exam period.

- Potential Topics:
"Election Reform in _____"
"An Explanation of Party System Evolution in _____"
"A Comparative Analysis of (the Media/Voter Participation/Party Identification/Government Interference) in Elections in (Africa/Asia/Central and South America/Post-Communist States/Western Europe)"
- Please note that you may not write a paper about a country in the group research project unless it is part of a broader comparison. Other topics are only acceptable if I approve them in advance.
- Both your proposal and paper should be prepared as professional documents. The papers must be typed, formatted properly (including a title page and bibliography), spell-checked, and proof read. The bibliography should include no fewer than 12 sources (no more than six may be web sites). You should use a standard, variable-width, 12-point font such as Times New Roman.

Your grade will be based on the presentation of the material as well as the content.

- During the final weeks of the semester, you will make a brief oral presentation of your research findings. You will receive further instructions about the presentation during the term.

Group Blog: You will be part of a working group studying elections scheduled to take place this term. Your team will create and regularly update a blog about your assigned election. Your posts should include information about unfolding events and your interpretation of them. You should integrate course material with other information (e.g., articles, maps, political party websites). At a minimum, you must post at least one time per week (see the calendar for more details). The group blog constitutes 20% of your grade.

- Topics include: country background, election rules, political parties, campaign issues, election administration, results, and consequences of the election.
- Elections: Slovenia Parliamentary Election, October 8, 2008; Belarus Parliamentary Election, October 12, 2008; Lithuania Parliamentary Election, October 12, 2008; Azerbaijan Presidential Election, October 15, 2008; New Zealand Parliamentary Election, November 15, 2008; Guinea-Bissau Parliamentary Election, November 16, 2008; Romania Parliamentary Election, November 28, 2008; Cote D'Ivoire Presidential Election, November 30, 2008.
- You will receive group assignments in the second week of class. During that week, your group should determine its preferences for the election it will cover on the blog. I will announce the final assignments at the beginning of the third week of class.

Quizzes: An online multiple-choice quiz will be posted once per week for the specified reading assignment. You must respond to the quiz by midnight on the day before the reading is due (the first day it is listed on the syllabus). Your performance on the quizzes constitutes 10% of your grade.

Attendance and Participation: Attendance and active participation in discussion accounts for 10% of your grade. I will take attendance at each class session beginning on September 2, 2008. For each class period beyond four that you miss, you will lose one point on your attendance and participation score.

GRADING SCALE

100-94 = A; 93-90 = A-; 89-87 = B+; 86-84 = B; 83-80 = B-; 79-77 = C+; 76-74 = C; 73-70 = C-; 69-67 = D+; 66-64 = D; 63-60 = D-; 59 – 00 = F

ACADEMIC INTEGRITY

If you cheat, plagiarize or commit any other violation of academic integrity, you will be assigned an F for the course. **Do not download your paper from a site on the Internet that provides or sells research material.** I will check student submissions using a plagiarism detection tool. All work in this class must be your own.
