

This document demonstrates how to use the package `gb4e` to make lists of examples.

1 Simple list of examples

- (1) This is the first example.
- (2) This is the second example.
- (3) Ok, that's enough examples.

2 Examples with judgments

- (4) I ate an apple.
- (5) *I ate apple an.
- (6) % An apple ate me.
- (7) ?I ate me.

3 Embedded example lists

- (8)
 - a. I gave John a book.
 - b. %I gave a book John.
 - c. *I gave a John book.
- (9)
 - a. I gave a book to John.
 - b. %I gave John to a book.
 - c. ?I gave to John a book.
